was a weakness and depression in Villard shares. These stocks were subjected to sharp attacks throughout the day and the lowest prices for sometime past were made. Northern Pacific common broke from 40% to 37%, preferred from 70% to 69, and Oregon Transportation from 657 to 60. Transactions were enormous, Northern Pacific figuring for 27,972 shares, preferred 106,315, Oregon Transportation for 70,300 out of the total sales for the day of 383,-866 shares. The break was caused by heavy sales, which were accompanied by a revival of the rumor recently current regarding the financial condition of the companies. It was also rumored the bull pool in shares had gone to pieces. At opening there was a general advance of to g per cent. The market then continued quiet, with some reaction, until late in afterneon, when, in sympathy with the

al reports: break in Villards, it declined \(\frac{1}{4}\) to 1\(\frac{1}{8}\). As compared with last night, closing prices are down \(\frac{1}{4}\) to 1\(\frac{1}{4}\) per cent closing.

FOR THE SPECIALIST.

Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its numerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them all Hence the necessity for dividing the labor. And it is true beyond all doubt that disease, affecting the genticountary organs need special study more than anything else, if we would understand and know how to treat them properly. reat them properly.

DR. H. WAGNER is fully aware that there are

DR. H. WAGNER is fully aware that there are many physicians, and some sensitial people, who will condemn him for making this class of diseases a specialty, but he's happy to know that with most persons of rofinement and intelligence a more onlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and saving them from worse than death, is no less a philanthropist and benefactor to his race than the surgeon or physician who be close application excels in any other branch of his profession. And fortunately for humanity, the day is dawning when the talse philanthrophy that condemned the victims of felly or crime, like the lepers under the Jewish law, to dis uncared for has passed away.

A Few Reasons

Why you should try the celebrated Dr. H. Wagner's methods of cure:

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was en-tirely avoided by the profession, and medical works of but a few years ago would hardly mention it. To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and mask dains about the matter without gloves and To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and speak plainly about it; and intelligent parents and guardians will thank him for doing so.

The results attending this destructive vice were for merly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not have close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitoment once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslayes the victim. Mental and nervous afficions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and cruptions on the face, etc., are also prominent symptoms.

If the practice is violently persisted in, more serious firm the sufferer may fall into a complete state of idiocy before, finally, death relieves him.

To all those engaged in this dangerous, practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fall, if your nervous system is already too much shattered, and consequently, your will-power broken, take some nervo tonic to aid you in your effort. Having freed yourself from the habit, I would further counsely you to go through a regular course of treatment, for it is a great will an appear to the practice of treatment, for it is a great instake to suppose that any one may, for some time, be if every so little, give himself up to

abandoned years ago. Indeed, a few months' practice of this habit is sufficient to induce spermatorrhoa in later years, and I have many of such cases under treat nent at the present day

Middle Aged Men.

There are [many at the age of 30 to 60 who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of abumen will appear, or the color will be of thin pulk-ish hue, again changing to a dark and torpid appearance. There are many meny men who die of this difficulty, ignorant of the cause, which is the second stage of seminal-weakness. Shall We Reform?

Specific remedies for all diseases is the theory practice at present of educated and experience physicians, and in all large communities they have their specialties, to excel in which they direct their studies and practice.
